

**Powerful
- with a fantastic view!**

Many years' experience

For more than half a century, DanTruck A/S has developed and produced medium-heavy industrial forklifts with focus on strong ergonomics, an outstanding operating economy, an optimal operation and performance as well as a high degree of customisation.

With the launch of DanTruck 3000 Power, DanTruck A/S draws on many years' expert knowledge from the well-known quality programme of very powerful forklifts for a new and light series designed for palletized goods. The new forklifts satisfy the high environmental and ergonomic demands on the Scandinavian market.

DanTruck 3000 Power distinguishes itself by an extensive standard equipment and a wide range of optional equipment. When combining this with an outstanding operating economy, you get the optimal solution. This series includes diesel and LPG forklifts with load capacities from 2,0 tonnes to 3,5 tonnes.

- Fantastic cabin
- Outstanding operating economy
- Rugged construction

Focus on the customer

The new DanTruck 3000 Power sets new standards for its class. The development effort has focused on being able to offer a forklift with an extensive standard equipment and a wide range of optional equipment requested by the Scandinavian market. In the process of developing this new forklift, DanTruck has been in contact with a number of customers on the Scandinavian market in order to develop the customers' preferred forklift. DanTruck 3000 Power has a number of obvious advantages to the customers.

Superior operator comfort

DanTruck is known for focusing on working environment and operator comfort, and DanTruck 3000 Power is no exception. The cabin has no blind angles and is a comfortable and safe work place for the operator. The fantastic view minimises the risk of damage to people and goods.

3-WAY CATALYST:

- Minimal environmental impact
- Outstanding fuel efficiency

DEFROSTER:

- Effective demist
- Optimum safety

MAST:

- Fantastic view
- Optimum safety

MINI LEVERS:

- Ergonomic operation
- Precision and ease

RUBBER SUSPENDED CABIN:

- Vibration-free
- Operator comfort

CABIN:

- Functional arrangement
- Low noise level

Comfort & ergonomics

Like all DanTruck models, DanTruck 3000 Power has been customised for the high demands on the Scandinavian market. Thus, the key features are ergonomic cabins, functionality, safety, and a low noise level.

The cabin is very well arranged and thus has plenty of room for the operator. The narrow profiles ensure a unique panoramic view. Quality components, an insulated engine compartment, as well as the construction itself, ensure a low noise and vibration level.

Design & operating economy

Unique industrial design with attention to the whole product as well as to the detail. A DanTruck stands out from the rest by its evident quality, dynamism and efficiency.

A DanTruck 3000 Power ensures an outstanding operating economy. The forklift has the longest factory warranty in the market, a low fuel consumption, and long service intervals. This – in addition to an optimum technical solution – guarantees you extremely low operating costs.
